Quando</p&gt; <p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin g the neighbouring structures and straddle shared utilities running under the si te, the 🍉 house was constructed using a lightweight steel frame on a pi led slab. The steelwork was prefabricated as a series of 🍉 portal frame s that were craned down the alley and site-welded together. Given that every inc h in such a narrow space 🍉 was valuable we chose to fully weld the conn ections and express the frame internally, even utilising the depth of the &#1278 17; steels to maximise the space.</p&gt; <p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork 🍉 flooring enriches the interior. Extern ally the timber framed walls are clad in handmade pewter glazed brick slips with a patina 🍉 that reflects the changing light of the sky. Both the simple y landscaped and planted rear courtyard and the garden in 🍉 front of the e house enhance the feeling of space in this small dwelling.</p&gt; <p&gt;This self-build project had a long gestation, fitted &#127817; in arou nd professional and family life. The design and construction were developed as t ime and money allowed so whilst planning 🍉 consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not

🍉 completed until August 2024. We worked closely with friend and joine

r Michael Tye to lead a small team of local 🍉 subcontractors and employ

ed specialist fabricators for certain key packages as well as undertaking a fair

of the work ourselves Olt. /poat.
