<p></p><p>To fully exploit the constrained width, avoid loading the neighbouring structures and straddle shared utilities running under the site, the 📉 house was constructed using a lightweight steel frame on a piled slab. The steelwork was prefabricated as a series of 📉 portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space 📉 was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the 📉 steels to maximise the space.</p>
<p>Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork 📉 flooring enriches the interior. Externally the timber framed walls are clad in handmade pewter glazed brick slips with a patina 📉 that reflects the changing light of the sky. Both the simply landscaped and planted rear courtyard and the garden in 📉 front of the house enhance the feeling of space in this small dwelling.</p>
<p>This self-build project had a long gestation, fitted 📉 in around professional and family life. The design and construction were developed as time and money allowed so whilst planning 📉 consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not 📉 completed until August 2024. We worked closely with friend and joiner Michael Tye to lead a small team of local 📉 subcontractors and employed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.</p>
<p>The 📉 result is a unique and highly crafted home that is a testament to the commitment, effort and support of many 📉 people. By replacing a narrow disused alley with this comfortable small home we hope to have enhanced the streetscape we 📉 inhabit. As the building completes the terrace, so does the front garden - with the simple bin store, planting, level 📉 access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. 📉 The development highlights the
