The easiest way to open an HTML file in Chrome is to double-click the file on your desktop computer. Then the HTML file should display in your computer's default browser.

[tiiny.host : blog : how-to-open-html-file-in-chrome/](https://tiiny.host/blog/how-to-open-html-file-in-chrome/)

[shecodes.io : athena : 4787-why-can-t-i-open-my-html-file-in-chrome/](https://shecodes.io/athena/4787-why-can-t-i-open-my-html-file-in-chrome/)

It is possible that your HTML file has not been saved with a .html extension. In order to open the file in Chrome, use a text editor to save the file as myfile.html and open the file in Chrome.
