The easiest way to take 20 percent off a price is to multiply the original price by 0.8. This will give you the price after the 20 percent discount has been applied. For example, if the original price is \$100, which is the price after the 20 percent discount.

The easiest way to take 20 percent off a price is to multiply the original price by 0.8. This will give you the price after the 20 percent discount has been applied. For example, if the original price is \$100, which is the price after the 20 percent discount.

What's the easiest way to take 20 percent off a price? - Quora : Whats-the-easiest-way-to-take-20-percent-off-a-price : Quora : Whats-the-easiest-way-to-take-20-percent-off-a-price

CR shopping editor Samantha Gordon likes to use Honey, a free tool that you can download on any browser. Once installed, it will automatically seek out discount codes and apply them when you're purchasing a product online.
