div class="hwc kCrYT" style="padding-bottom: 12px; padding-top: 0px;">While Call of Duty: Modern Warfare 3 did launch with support for upscalers like DLSS 3 and RTX 30 Series, it does not feature ray-tracing.

That will change with a patch this week, bringing ray-traced graphics to the game, but there's a catch - ray-tracing will only be shown in the pre-game lobby and not during actual gameplay.

You'll only get ray-traced graphics in Modern Warfare 3 and Warzone.
