Apple has decided not to support running Windows with Boot Camp on Apple silicon Macs. While Parallels Desktop can run Windows on an M1 Mac, VMware Fusion cannot. With Parallels Desktop, the process is exactly the same as on an Intel Mac, with the exception of needing a specific version of Windows.

How to Run Windows on an Intel or M1 Mac - The Mac Security Blog : mac-security-blog : how-to-run-windows-on-an-intel-o...

Virtualization software is the only way to run Windows on an M1 or M2 Mac. There were several very good options for virtualization tools available for Intel Mac computers, but partly because of the challenges of moving to a different architecture, not many remain.

How to run Windows on M1 and M2 Mac computers - MacPaw : macpaw : how-to-run-windows-m1-m2-macs
