ãThe term was coined in 1915 by medical officer Char
les Myers. At the time it was ã believed to result from a physical inj
ury to the nervous system during a heavy bombardment or shell attack
, later it became evident that men who had not been exposed directly to such fi
re were just as traumatised.

ãDespite medical alerts, lon
g term trouble were disregarded as a cowardice and weakness of mind by military
leadership. In recent decades and following the 2003 Iraq war, ã shell
shock have been linked to biological brain damages, such as concussions and mic
ro-tearing of the brain tissues
