<p>The TL;DR version of this review is: surprising light, extremely pocket
able, does the job, not my dream charger but at 🍎 the price it s well w
orth it.</p>

<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes 🍎 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 † 🍎 USB-> MicroUSB,) or ch
uck your ID and credit card in and use it as a wallet while you re out. It s
27822; actually the first thing that stood out when I was looking at the device
. The Moonstone is still going strong 🍎 with a friend of mine a year la
ter.</p>

<p>The battery delivers a 90% conversion efficiency rating according to sp
ecs on the 🍎 manufacturer s website. Most batteries go from the high 70
s to mid 80 s. You want to see a higher number as 🍎 this is how much p
ower gets delivered with the rest being lost in conversion.</p>

<p>The Poki can charge and recharge at 🍎 2.1amps. This means you
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you
should 🍎 be able to charge this in under five hours and with 90% conve
rsion efficiency you should have around 9000mAh of 🍎 actual juice to sp
are. That should be enough for at least three complete charges from dead to full
for any 🍎 smartphone on the market today.</p>

<p>2.1 amp charging also means you re not going to spend ~7 hours charging
a 3000mA phone 🍎 from dead, more like an hour and a half if your phone
supports it.charging that fast.</p>
